ENTERPRISE SYSTEMS DATASHEET

The End-to-End Fleet & Logistics Operations System

Streamline dispatch, track high-value freight in real time, strengthen fuel control and automate compliance from one unified operating platform.

COMMERCIALISED EXCLUSIVELY BY AURUM & CO

Aurum & Co is the exclusive commercial and business development distributor for this enterprise logistics platform. We support complete deployment, system setup, user onboarding and ongoing strategic integration.

PLATFORM CAPABILITY

One system across critical fleet workflows.

A modular operations platform designed to connect field activity, operational control and management visibility.

01

Fleet & Telematics Management

Real-time GPS, engine diagnostics, geofencing and driver behaviour scoring create a live operational view of the fleet.

02

Order & Waybill Automation

Digital proof-of-delivery, automated invoicing and client tracking portals connect the order journey from dispatch to completion.

03

Fuel Audit & Maintenance Engine

Track fuel consumption per kilometre, identify irregularities and schedule vehicle servicing through one control environment.

04

Subcontractor & Tender Management

Manage third-party fleets, compliance documentation and contract requirements under one unified operations portal.

DEPLOYMENT PARTNERSHIP

From operational audit to adoption.

Aurum & Co aligns system configuration, integration and onboarding with the operational and commercial priorities of each fleet environment.

01

Operational Audit & Needs Assessment

Map fleet workflows, users, pain points, information requirements and business outcomes.

02

System Customisation & API Integration

Configure modules, tailor controls and connect the wider operational technology environment.

03

Deployment & Onboarding

Prepare the production environment, migrate information, test workflows and enable users.

04

Ongoing Integration & Growth Support

Support adoption, optimisation and commercial expansion as requirements evolve.
